Mr. A. K. Sparks
Vice President and General Manager
Norplex Division
UOP Inc.
P.O. Box 1448
LaCrosse, Wisconsin 54601

Dear Mr. Sparks:

We have reviewed your letter of August 24, 1982, and the two enclosures. Based on the report by A & A Chemical Laboratory the solidified resin sample passes the hazardous waste characteristics tests and thus not regulated as a hazardous waste. Therefore, your firm's amended Part A showing the deletion of storage in tanks, SO2, is correct. However, it is not a complete submission because of the lack of your signature and date on both Forms 1 and 3. Please sign and date these forms, which are enclosed, and return them promptly to us. Along with these corrected forms, please submit an amended and completed notification form designating generator status only as stated in your cover letter of August 24. In addition, you need to submit your facility closure plan to both the Environmental Protection Agency (EPA) and the Iowa Department of Environmental Quality (IDEQ).

Once these corrected forms are received, facility closure has been completed, IDEQ personnel have reviewed and completed an inspection(s) to verify proper closure of your drum storage facility, your firm's interim status authority will be revoked.

Please submit copies of your cover letter, amended and signed Part A forms, an amended notification form and a facility closure plan to both IDEQ and this office.

Your prompt cooperation is requested and encouraged. We recommend that this be cleared up soon so we can close out the Part B process of your Postville, Iowa facility, and your firm can avoid having to comply with forthcoming financial assurance requirements.

Sincerely yours,

Lyndell L. Harrington, P.E.
Chief, Permits Section
Waste Management Branch
Air and Waste Management Division
